Zenetta Henschman has lost faith in humanity. After attacks against herself and those she cares about, faith is hard to keep. It doesn't help her struggle when her father, the only Black officer on her town's police force, chooses to act against his community when he's needed most. This betrayal is just part of the event chain that teaches Zenetta about her chilling reality.

*The Price We Pay*, coined the *To Kill a Mockingbird* of the 21st century, depicts the ultimate price that is paid by those who choose to remain silent, and by those who choose to speak up.

## REVIEWS & PRAISE

- Early Reviewer

"I haven't read a book that intertwined history, fact, and fiction so prolifically since BeBe Moore Campbell's *What You Owe Me*, or a main character so young but beyond her years in enthralling experiences since Sister Souljah's *The Coldest Winter Ever*."

- National Best-selling Author E. N. Joy
